First name: Emily

Last name: Sadow

Organization: Friends of the Wheeler Peak Wilderness

Title:

Comments: Dear Supervisor,

Please regard e-bikes as what they are, motorized vehicles. The impact of these bikes on trails/roads where currently motorized vehicles are NOT allowed will be immeasurable. The popularity of these machines is growing exponentially. They are a wonderful resource, but should not be allowed to adversely affect the wildlife, people, and environment. I understand that they make things more accessible for people. However, if we say that every time we want more access for people there would be no wild places left. I cannot physically go to certain places, but I will not ask a for lift or road to be built for my own pleasure of arriving there. Please do the responsible thing and keep current non-motorized trails and roads non-motorized to ALL forms of travel.

Respectfully,

Emily Sadow
