Comments: I am totally AGAINST allowing e-bikes on non-motorized trails! I already am impacted (bothered) by regular, pedal , mountain bikers careening down trails too fast, looking at the ground and not seeing myself as a hiker and as a horse rider!

PLEASE, understand that a battery operated bike IS motorized. Human-provided power is the only acceptable power on non-motorized trails!

The majority of users of these trails are opposed to the use of e-bikes on currently non- motorized trails.
