Comments: I am OK with ebikes being allowed on trails/roads that are already open to motorized vehicles, but not those that currently prohibit them. I don't like ebikes except those used for transportation/commuting. E-MTB's are mini motorcycles and will only get more powerful over time. Let those that are able to muscle their way to remote parts of the forest under their own power experience the same thing that hikers can in Wilderness designated portions of the forest. Remoteness with maybe no one within miles of them.
