Comments: I train horses and am therefore out on the trails a lot. Even to horses who have been out on the trails hundreds of times, bikes can be incredibly scary. At least with regular pedal bikes, the horses can hear them coming (as can us riders) and we can prepare them for the interaction. But e-bikes are incredibly quiet and therefore will put us and our horses in dangerous situations. Spooking a 1000lbs animal by coming up from behind (or even in front, on a foreign object like a bike) increases the risk of incident and injury. Please do not allow e-bikes on the trails. There are so many other places for them to ride. But us and our horses only have these trails. Please don't push us out by allowing e-bikes into these spaces.

Thank you.
