Title:

Comments: I am opposed to E bikes on federal land. Honestly I am opposed to traditional mountain bikes as well. As a horse owner and trail rider that has rode the trails all over Washington state I can tell you it is sad to see the over use of our natural resources. In over 30 years of riding I have not seen the damage I see today with more and more people using the trails. Also the speed of E bikes and how quiet they are has potential to cause injury to horses riders and E bike riders as collisions are sure to happen.

No motorized vehicles period doesn't not matter how they are powered they are motorized.

Thank you

Sami Jo Vertz
