Comments: The time has come to face the reality that ebikes are here to stay and they provide an opportunity for folks to enjoy Forest service trails and roads that regular bikes are allowed to use. We are not all Olympic bikers in top physical shape. The greying of our population has resulted in massive numbers of people that used to be capable of rigorous exercise but that day has passed. We still want to get out and have the open experience of bike riding but just do not have the muscle or stamina. Ebikes make this possible. I currently ride on BLM land but do wish the better trails and roads maintained on forest service land was approved for my ebike use.
