Title:

Comments: Please do not allow e-bikes on horse trails. The potential for danger is just too much. Already we horsemen are dealing with people who lack judgement around living animals. It happens every time we go out to skull hollow, at least one biker flies at us full speed from behind and then doesn't understand when my horse, who is very frail savvy, but blind in one eye, whirls around to be able to see them. These e-bikes make different noises and can go much faster than the bicycles we already have. I cannot imagine my horses reaction. I teach my horses about bikes and desensitize them. I do NOT want to have to purchase a bike I don't intend to use, just to desensitize my horse. At the very least If you plan to allow them, make them responsible for interactions with dogs and horses. If there is an accident because of them, they have to suffer financial consequences. The current bikers already feel they own the trails and don't care about animals.
