Comments: I am writing to express my opposition to the updated directives on E-bikes. As a dedicated forest trail user, I am opposed to any E-bikes on trails. Trails have been designed with foot, equestrian, and (non-wilderness) human-powered bikes. E-bikes are, essentially, underpowered motorcycles. Trails have not been designed to handle this new motorized us. Sight distances may not be good enough for a vehicle traveling at 20 mph, trail surfaces are not hardened to withstand the impacts of an electric-powered machine. The noise is not consistent with trail travel. Just say NO!
