Comments: I encourage the use of any and all National park recreation facilities. I am opposed to any use of motorized/motor assist bike or other vehicle on current non-motorized designated roads or trails. I understand this issue needs to be addressed. These new vehicles can obtain a fairly high speed and are not noise free. Both these issues, in my opinion, are contrary to intended experience we have come to expect on the current non-motorized vehicle designated trails. Many states and several National parks have designated trails for motorized sport vehicles. Let's have peace on the trail.
