Title:

Comments: Please do not open our forest trails to e-bikes. As an avid hiker, I have seen the impacts of mountain bikes on our high country trails. Trails have become deeply eroded. Bikes blaze by hikers, some quite rude. In our local forests, so many social trails have been created by mountain bikers, mostly on steep downhill creating serious erosion issues. If you give these riders an inch, they take advantage of the place for their own pleasure not seeing the bigger picture of habitat, of peace, of shared trails. Please....no e bikes in the National Forests. Please.
