Title:

Comments: I think the most important thing about this is the people from Idaho that might be hired to work . The average pay will be \$80K plus which is higher than most people make.

We can also mine antimony, which will make us far less dependent on other countries. It's about time we became somewhat independent!.

It will also mean the salmon can see their can use their spanning grounds again.

I am writing you in hopes you'll permit this in the near future.
