Title:

Comments: I am against any ebikes on Forest Service land. I've witnessed first hand the difficulties that have been brought about with allowing ebikes in the Park Service. It creates more opportunities for an ignorant and ill prepared visitor to get themselves into greater trouble farther from rescue. It allows the ignorant and careless visitor a greater range of destruction. As soon as it is opened up bike shops pop up with rentals and it changes visitation in a way that our public lands are not funded to meet.
