Comments: Thank you for your reviewing of this topic. I support adopting all e-bikes (Class 1 Class 2 and Class 3) as motorized transportation. Currently Class 1 technology is easy to spot visually. However the future of this technology will bring smaller form factors that are less easy to spot. And become easier for users to modify to higher performance. For this reason no eBikes should not be allowed on non-motorized trails. As this would jeopardize funding for these existing trail systems, and detract from the non-motorized experience.

I also encourage using the signage expectation for eMTB access of "Closed Unless Signed Open".

Thank you,
