Comments: I'm an advocate for e-bikes being allowed on all trails motorized or not and believe it's just a matter of time before there allowed everywhere. On a federal level they have been declassified from motorized vehicles because of there low speed governors. In my time riding this year I can't say how much everyone I've met on the trails with an e-bike has to stop to talk about the amazing opportunities it's allowed the to experience or the places they otherwise wouldn't travel to ride. Honestly how many of us want to travel for hours to get somewhere then be ready for the grueling climb you have ahead of you still just because you want to see the views Alaska has. This summer has been the incredible in terms of places I've gotten to go visit and ride and it is just the first of what I hope to be many years of riding in this beautiful state get to live in.
