Comments: I can easily support the use of e-bikes in our National Forests. The reason I own an e-bike at age 69 is to help me ride up a hill. It's that simple. My observations come from watching others use the trails. Mountain bikes can be hazardous because of the speed and aggressiveness of the cyclists; motorized racing bikes tear up the trails and even purposefully create new ones. E-bikes cannot reach the speed that all terrain bikes are built to achieve. Thank you for this opportunity to express my viewpoint.
