Title:

Comments: I am 67, and survived a serious stroke. My doctor wrote a prescription for an eBike for exercise. I use it to get into the back country trails that I used to ride on horseback. I paid my taxes, more than most, and I should not be banned from the forest trails that I love. All US Citizens over 65 should be able to purchase a permit to ride their trails on a Class 1, electric Mountain Bike.
