First name: THomas

Last name: Donovan

Organization:

Title:

Comments: I believe we need to have an inclusion of E-MTBs. This additional recreational activity opens up this sport to those that have been fans for many years like myself but unfortunately at 56 I struggle to get up the hills like I used to but I still love the sport. I recently was able to ride an E-MTB and I have to say my passion for riding is back. I think this helps create a way for all of us to enjoy this fantastic sport. I have been riding since back in the late 80's all over the country and I just could not enjoy it like I used due to the big climbs. The motor helps us go up and we are all the same going down which all about gravity.
