Title:

Comments: I do not support the Stibnite Gold Project. According to the DEIS, Midas Gold's plans, if implemented, will be detrimental to local fish populations. Our fish are precious and should not be risked.

As a member of the younger generation and a soon-to-be voter and taxpayer, I do not want to be left with another environmental disaster to clean up. Superfund sites are a drain on public resources, and I fear that the Stibnite Project will become one. This foreign company will run off with Idaho's gold, make a large profit, and leave behind a mess. Please do not allow Midas Gold to ruin our mountains and rivers for generations to come.
