Last name: White

Organization: Citizens For Balanced Use

Title: Executive Director

Comments: Citizens for Balanced Use OPPOSES allowing motorized E Bikes on non-motorized trails. E-Bikes are a form of motorized transportation and will add to user conflict and reduce safety on these trails. E-Bikes are capable of speeds up to 20 to 30 miles per hour while non motorized trails, on average, are used by people moving at 2 to 10 miles per hour. These increased speeds could result in collisions and human injury. Response to injury by first responders on non-motorized trails is slower and may result in human mortality. E-Bikes by definition are motorized and should be restricted to motorized trails only.

Thank you
