Comments: To whom it may concern,

I implore you to reject this proposal on the grounds that no mining operation can completely prevent environmental impacts, and a mining operation such as this will inevitably lead to contamination downstream. The rivers and valleys downstream of this river are exceedingly popular with the outdoor recreation community which is a more reliable and longer-lasting economic driver for the region. When (there are no ifs for environmental impacts from mining) the mine contamination impacts the river systems, there could be a devastating impact to the quality of the outdoor experience which drives the outdoor recreation economy for Idaho. Again, do not allow this project to continue.

Regards,

Greg
