Comments: Thanks for taking input on Ebikes.

I would request that class 1 Ebikes be allowed on all trails and roads that human powered bicycles are allowed on.

I am 56 years old, I have ridden Mt Bikes for over 40 years, an original here in Marin County. Ebikes are great for my aging legs and knees allowing me to still enjoy the rides that my age and fitness no longer allow me to easily ride.

Ebikes allow me to climb with my younger friends up the hill. There is little to no assist from the motor down the hill.

If you are a decision maker, I ask you to ride an Ebike on the trails before you make a decision about their access
