First name: Jones

Last name: Charles

Organization:

Title:

Comments: Please do not allow electric bicycles on trails that only allow nonmotorized transportation. These E bikes are literally a motorcycle. Has there been an environmental impact statement written for such? Please preserve our national forests and keep the traffic as foot traffic or horse/mule where motorized vehicles are not allowed. An E Bike is motorized. Even though the motor is electric, the E Bike is motorized. Our wild lands should remain wild. I cannot imagine meeting an E Bike on the trail a 25mph, and they are capable of said speeds.

Thank you for your time.

Charles Jones
