Comments: I am writing in regards to the Forest Service's proposed revisions to directives regarding management of electric bicycle use on National Forest System lands (FSM 7700 and 7710 E-bikes #ORMS-2619).

I do not support ANY change in Federal policy allowing for more vehicle usage on any National Forest land.

I do support changing the Federal response to traditional and electric assist bicycles on National Forest Land away from such generalized terms such as "vehicle".

We must be able to accommodate bicycles without having to risk the consequences of increased ATV/OTV/ORHV/ etc on National Forest Land.

There is no meaningful relationship between an electric quad cycle and an electric bicycle. Therefore NO reason to lump these two user groups into the same policy.
