Comments: I am an avid mountain biker for over 10 years and recently purchased an ebike as i have compressed discs which limit my ability to ride. eBikes allow me to continue the sport that I love without the pain. I believe it is the rider's responsibility to be responsible when riding an ebike just like any other bike. No one owns the trails whether its hikers, horseback riders, mountain bikers, etc. Respect for one another and being courteous is the real problem.
