First name: Ford

Last name: Smith

Organization: Regenerative Land Solutions

Title: Partner

Comments:

After reviewing this project, it is clear that the economic and environmental damages caused by this mine will in no way be outweighed by the hypothetical economic gains. Regenerative Land Solutions has seen similar projects like this get approved in the past and we highly urge this project be denied so the public isn't left paying the negative externalities for years to come like they did with those projects.
