Comments: Attention Ms. Jackson,

Midas Gold Idaho's Stibnite Gold Project presents Idaho, particularly rural Idaho, with a huge economic and environmental opportunity. I am writing to encourage you to permit the project as quickly as possible.

The Stibnite Gold Project is a huge opportunity for Idaho and our country. While the site is rich in gold deposits it also has deposits of antimony ? a mineral designated critical by the U.S. government. In fact, the Stibnite Gold Project is the largest known deposit of antimony in the country. We depend heavily on China for this mineral. Antimony is crucial to the defense and energy industries and is in many items we use on a daily basis, like our cell phones. Permitting the Stibnite Gold Project will allow us to have a domestic resource for this very important mineral.

The comment period has been extended once already. It should not be delayed further. This only delays Idaho from recognizing the benefits of the project. The current USFS timeline provides plenty of time to review the DEIS and comment. After reviewing the document, I encourage you to permit alternative 2 of the project.

My best,
