Comments: The South Fork is a special place to me and it should be a special place for everyone because it holds so much beauty and history. It should not only be saved from the destruction that the mining project would inevitably bring but it should be saved from all future projects like this. History has shown us time and time again that the cleanup on these types of projects always falls on the citizens and tax payers. Let us please not make this mistake again! Stop the mine and save the South Fork. We make it way too easy for these companies to come in, make their money and then walk away leaving a mess and the destruction of a sacred place. Please STOP this mining project!
