Title:

Comments: Please, please do not allow this foreign-owned mining project to be allowed in our beautiful state of Idaho. This area is so pristine and magical. To have an outsider come and destroy our land is appalling. All in the name of the Canadian dollar.

This project has so many negative possibilities that can be better illustrated by those who are much smarter on the subject matter than I. Please listen to them! One of my biggest fears is that the project gets started and then the company decides to stop the project for some unknown reason or goes bankrupt and the project is left as is with Idaho having to (hopefully) clean up their very expensive mess. Or worse, it is just left the way they deserted it!!

Please do not allow this project to take place on our beautiful lands. Our animals, ecology, and recreational enthusiasts do not want this to happen!!
