Title:

Comments: This mine is a short sighted project. We all know that this type of mining scars the earth. Midas Gold will milk this mine for every dollar they can and then leave the tax payers to flip the bill for the clean up. There is much more value in eco tourism in this area if you are looking to bring jobs to the area. Jobs on a mine like this won't even last a generation. Please consider the future generation in this decision making.

-Mitch Sheridan
