Comments: I do not support the redevelopment of the Stibnite mine.

The drainages of the E. Fork S. Fork Salmon and the S. Fork proper offer stunning whitewater recreation and salmon/steelhead habitat. These are highly likely to be threatened by the redevelopment proposal. I do not believe the job benefits are worth the risks, nor do I believe the site will be improved after Midas Gold is through with the site. The land can provide plenty of sustainable jobs without this mine as it is. Precious metals can be harvested from less critical areas to support our growing and changing world. Stibnite Mine should be a piece of history, not our future.
