Comments: To whom it may concern,

I am writing to request an extension on comments in regards to the Midas Gold mine project and the SF Salmon River area. Please allow more time for comments as people of the land, myself included... some are just now hearing about the proposal and would like a more adequate amount of time to do research on the effects to include positive and negative consequences of the project that may be implemented on our public land. Please honor this request. Thank you kindly.
