Title:

Comments: To whom it May Concern,

My name is Tyler Babcock. Most of my life has been on, around, or in rivers, and water in a liquid or frozen state. I spent summers in my youth guiding on the Main Salmon, and learned to kayak there. I guided for nearly a decade on the Snake River in a canoe, raft, or kayak. Now I am a guide in the Grand Canyon on the Colorado river. I grew up in the West. I am no stranger to fossil fuels companies trying to steal public land to profit from. The South Fork and its surrounding area is not a dirt patch in the middle of no where, to say it is beautiful if an understatement, it's heaven if there is one. Please be responsible with my(and your) public lands.

?I am writing to ask the Forest Service to create a Supplemental Draft Environmental Impact Statement for the relative agencies and public to review and have the opportunity to comment on in order to address all of the missing and incomplete information of the current DEIS highlighted below.

I noticed there is a lot of missing information, and the best way to capture that is with a supplemental DEIS. So as a responsible agency who is involved with managing public resources, such as water quality and quantity, I ask that you please provide the aforementioned information."

\* While I am also writing to support Alternative 5, the No Action Alternative outlined in the existing Stibnite Gold Project's Draft Environmental Impact Statement, the requested Supplemental Draft EIS is crucial for review and consideration.
