Comments: This Stibnite Project is unacceptable on every possible level. Gold mining is one of the most polluting industries in the world, and Stibnite is pretending that there will be no environmental damage to our rivers here in Idaho.

That is a lie, and the whole issue with dealing with Midas Gold is that they have consistently lied over the last 10+ years they have been trying to weasel and harass their way into Idaho with help from Senators Risch and Crapo...to their further shame in selling Idaho to the quickest buck and with no regard for those who rely on clean water and verdant mountains and meadows. Water is our most precious resource, and will become even more so in the coming decades. NO MIDAS.
