Comments: I strongly oppose the Midas Gold Stibnite mining project for many reasons. History repeats itself for a reason. Midas Gold and other mining companies have been promising safe mining operations for decades without any consequences of their failures. Claiming bankruptcy and walking away from disasters has been their operating procedures despite promises of cleaning up after themselves. Please, take a look at history and prevent the next mining disaster before it starts. I make my living as a fishing and rafting guide on the Salmon River. The beauty of the Salmon River drainage, and the population of native fish should not have to be compromised because of a dollar value. We need to protect our resources and keep our ecosystems intact in order to continue to keep their value. Selling out Idaho is not worth the RISK. Thank you for your time and the effort you took to read my comment.
