Last name: Leman

Organization:

Title:

Comments: Hello, I am writing in defense of our rich resources. We must not move forward with this project due to the unforeseen downstream effects, especially on the aquatic wildlife. This project must be delayed until rigorous studies from an outside source can be performed to assess the detriment this project may cause. I am writing in defense of my niece, whose love of fishing would be severely impacted by this project.

Best,

Daniel Leman
