Comments: Hello. I am an avid rafter and love the Salmon River and it's tributaries. I have spent a life time on this river and the impacts of a mine would be devastating. Please consider the ridiculousness of putting a mine next to this river. In this modern world we need to look for ways to continue to live on this planet, not rape it of it's resources. No matter what the miners say they are gonna mess up this river. And that can not be undone.
