My concerns of this project are:

Too much heavy truck traffic on Warm Lake Road, a road I heavily use to recreate off of and that is already a major highway into the wilderness area and National Forest Lands.

The leaching of harmful chemicals into our Wild and Scenic Rivers. Which will ultimately kill off fish and harm other wildlife that survive off the rivers.

The leaching of harmful chemicals during transport.

New infrastructure being built in pristine areas.

No new local jobs. Most of the jobs that Midas will create will employ out of state people, not our locals.
