Comments: I am very pleased that Midas Gold will be bring mining back to Idaho. Midas has been unbelievably transparent in how the will run their operation. They have bent over backwards to get community feedback and have been willing to jump through whatever hoops need to start off on the right foot. I think they take the environment very seriously and will end up fixing a lot of the damage that was left behind from mining in the old days. We have to get these minerals from somewhere, it might as well be from our own backyard. (Done with care.)
