Comments: I am writing to oppose the Stibnite Gold Mine. The East Fork South Fork and South Fork Salmon River drainages are such special places that should be protected from mining and the additional infrastructure this brings. Idaho should be proud to offer such a quality and remote place such as found near Yellow Pine.

The mine makes a lot of promises. If these promises don't work out as expected then all that is left is a big environmental mess. Having huge impacts on the wilderness that these headwaters flow into.

Thanks for your consideration into this matter.
