Title:

Comments: Hello, can we just stop having greedy money chasers dictate how we want our lands to be managed? We need to move on from naturally extracted resources, as it's been proven time and time again to be not only running out, but hurting our planet's natural systems and biota. Use your heads for once and listen to what the educated people have to say! Screw old energy... if we cannot stop extracting our resources then we are doomed to have horrible lives in the wake of ecosystem destruction.
