Last name: Conde

Organization: citizen

Title:

Comments: Please do not allow Midas Gold to mine in Stibnite/ South Fork Salmon watershed. This is a loose loose situation for citizens of Idaho, wildlife and our water. This drainage already has massive lead and other heavy metals that are well over the TMDL. Do not allow a huge corporation put profits over the health of our river! This is a very special watershed that you do not find in many other places. We must continue to allow Mother Nature to rehabilitate this river from the mining operations of the past. We must preserve this river for future generations, wildlife and aquatic life. PLEASE STOP MIDAS GOLD FROM DESTROYING THE SOUTHFORK SALMON. Thank you!
