Comments: I oppose the Stibnite Mine Project. As a Valley County resident, angler, whitewater rafter, hiker, camper, skier, my life would be directly impacted by Stibnite Mine. I understand the economic boost the mine would give the economy of Valley County, yet still oppose it. I believe the economic benefits do NOT outweigh the detriment to the environment the mine itself and the transportation infrastructure would cause. Our forests and river system are too valuable to human and wildlife to subject it to extensive mining operations. This area should be conserved for generations to come. Soil and water are not commodities I am comfortable trading for corporations or persons to get rich. Please, please, please take into consideration the lifestyle and quality of life we in Central Idaho have cultivated. With many more people discovering Idaho and moving here, we will be up against many challenges in the next few years. Please reject the Stibnite Mine proposal so this part of our beautiful country can continue to regenerate the salmon populations and enjoy clean water. Thank you.
