Title:

Comments: A mine @ the top of the s fork salmon drainage risks too much. The south fork is a gem and the economy surrounding it and the main salmon down stream is too valuable to risk.

As a father I hope my kids can experience the same beautiful and wild place I was able to explore. The south fork is one of the places that makes Idaho special. Save it!

I appreciate you listening to the voices of the people who use and love the Frank Church.

Aaron
