Title:

Comments: We need to protect some of the last truly wild land in the lower 48. The fact that we are considering this is despicable and the environmental damage that will threaten and destroy our wilderness is concerning. The fishing impacts as well as the impacts this would have on other recreational activities that bring in businesses for your state and surrounding states alone should be the reason we do not allow this to happen. I am fortunate enough to take advantage of the opportunities that places like the Salmon River afford me and it will be a shame if I can not give my kids kids the opportunity to say the same thing.
