Last name: Dodge

Organization:

Title:

Comments: I urge you as strongly as I can to listen to the science on this one and understand that once this project starts it can only snow ball into an environmental catastrophe no matter how well it goes, leaving a scar on one of the last few pristine wildernesses left in this country. I understand the USNF as an organization is in a tough place where you are in dire need of more funds to manage the lands your tasked with managing while at the same time needing to preserve those lands for generations to come. It's not an easy job and I don't envy you for it. But please I beg you do not be blinded by the God of Gold and allow the Stibnite Gold Project to progress any further, it must be shut down now.

Thank you for considering my opinion,

Alex
