Title:
Comments: Please reconsider this obvious land and resource rape and pilage. As a 4th generation Idahoan, My family has watched the destruction that out of state and out of country powers has done to our beautiful state. There is no amount of money or promised restoration that can compensate for the unnecessary damage that this project will impart. This is purely a numbers game and midas gold will do the minimum that they can to profit off of our state at all costs. Keep Idaho wild. Keep the streams and roads clear. If they are truly interested why not make them do their restoration projects first and then we can vote if they deserve to reap the financial rewards. The south fork salmon watershed is so important to wildlife in Idaho and the whole united states based of how unmolested it is. Lets keep it that way.
