Comments: Idaho's human health and ecosystems is more important than the antimony that will be extracted and leave our state to enrich others. Also, I have no doubt that huge pits and spoil piles will be left to ruin Idaho fisheries as reclamation funds are never sufficient to rehabilitate the scarred and sickened landscape, leaving Idaho citizens to foot the bill. I am 110% against the Stibnite Mine and think it's a 19th century proposal that is wrong for Idaho.
