Title:

Comments: Our trails can not sustain the higher usage that will come with e-bikes. We have many trails in our area that are frequently "shuttled" and these trails are used heavily, and are in very poor condition by the end of the year, with greater erosion and wear. E-bikes will increase this problem.

Furthermore, there are already many areas set aside for motorized vehicle use. E-bikes have motors, and thus clearly fit in this category.

Do not allow e-bikes on the existing mountain bike trails.

Sincerely,

Dylan Mason
