First name: Thom & Liz

Last name: Tash

Organization:

Title:

Comments: We are opposed to any project that proposes to store millions of tons of TOXIC sludge on public land forever! We are opposed to any project that proposes to pollute water at the mine site that exceeds state water quality standards and mercury levels forever!! We are opposed to any project that proposes to transport hazardous chemicals through our communities EVER!!

We feel that this project will forever change the natural condition of our public lands that make up the greater South Fork of the Salmon River drainage. The only viable reason that Midas Gold is proposing this devastating project is for money and profit without regard to the natural environment.

We don't believe that we should trade something so precious just for money and profit!
