Comments: To Whom it may concern,

I would like to request an extension to the comment period regarding this issue. Unfortunately I'm just learning about this proposal and would like additional time to build a well informed opinion.

However, if it is too late to request an extension to the comment period I have to say that, as a new father, and with the information immediately at hand, I cannot support this project. I need to err on the side of safety, leave the land as is! As a frequent wilderness user and river enthusiast I look forward to sharing Idaho with my son. I look forward to sharing the experiences that I have had; untrammelled, wild and free lands. I hope to float rivers, fish, hunt, camp and eat and drink from the land with my son. It seems that these dreams may not be assured with the proposed mine.

Please consider extending the comment period. Allow me the opportunity to get a better perspective. Afford me the right to further review the proposal, potential outcomes and related benefits in greater detail. Allow me the right to ensure my son is able to benefit from our public lands and rivers to the greatest extent possible.
